DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9, 12-14 are allowed over the prior art.

The following is an examiner's statement of reasons for allowance:

As to claim 1, Kim (US 20020039890) teaches mobile telephone body; Wu et al (US 20030211834) teaches mobile phone; Whitney (US 6,320,963) teaches secrecy cover for key matrix; Lefort (US 7,019,985) teaches electronic device with a variable keyboard; Hyotylainen (US 7,106,857) teaches wireless communication devices. The teaching of these prior arts either combined or alone fails to teach a key independently hinged to a second portion of the first side of the body and pivotable about a pivot axis, a portion of the key overlying a third portion of the first side of the body and occupying a key region of the mobile communication device for actuation of the key; wherein the key region resides between the display region and the pivot axis and the third portion of the body resides between the first and second portions.

Dependent claims 2-9 are allowed for the same reason.

As to claim 13, Kim (US 20020039890) teaches mobile telephone body; Wu et al (US 20030211834) teaches mobile phone; Whitney (US 6,320,963) teaches secrecy cover for key matrix; Lefort (US 7,019,985) teaches electronic device with a variable keyboard; Hyotylainen (US 7,106,857) teaches wireless communication devices. The teaching of these prior arts either combined or alone fails to teach a first key hinged via a first one of the plurality of hinges to a second portion of the first side of the body and pivotable about a pivot axis, a portion of the first key overlying a third

portion of the first side of the body and occupying a key region of the mobile communication device for actuation of the first key; wherein the key region resides between the display region and the pivot axis and the third portion of the body resides between the first and second portions.

As to claim 14, Kim (US 20020039890) teaches mobile telephone body; Wu et al (US 20030211834) teaches mobile phone; Whitney (US 6,320,963) teaches secrecy cover for key matrix; Lefort (US 7,019,985) teaches electronic device with a variable keyboard; Hyotylainen (US 7,106,857) teaches wireless communication devices. The teaching of these prior arts either combined or alone fails to teach a first key hinged via a first one of the plurality of hinges to a second portion of the first side of the body and pivotable about a first pivot axis, a portion of the first key overlying a third portion of the first side of the body and occupying a first key region of the mobile communication device for actuation of the first key; and a second key hinged via a second one of the plurality of hinges to a fourth portion of the first side of the body and pivotable about a second pivot axis, a portion of the second key overlying a fifth portion of the first side of the body and occupying a second key region of the mobile communication device for actuation of the second key; wherein the first key region resides between the display region and the first pivot axis and the third portion of the body resides between the first and second portions and the second key region resides between the display region and the second pivot axis and the fifth portion of the body resides between the first and fourth portions.
